MAIN LINE WEB DESIGN · FOR PENNSYLVANIA LITTLE LEAGUE DISTRICTS

A Modern Home for Your District

Scores, schedules, tournament brackets, champions, umpire assigning, and texting that reaches every family, all on one site that runs itself. Here is everything it does, shown on a real district site I built.

Every	Every	Every	One
league	tournament	champion	site

I built PA District 27's site. The district runs it, I handle the changes.

I have built sample sites for districts across Pennsylvania — I can build yours on your real data.

01 WHY THIS MATTERS

Your district deserves better than a dead website.

Most districts run on a site nobody can update, or no site at all. During tournament season that gap becomes your problem, one text and phone call at a time.

What families deal with now

- "What field are we on?" "What time?" "Who won?" — texted straight to you.
- A Facebook page they have to dig through, or a site that has not changed in years.
- No schedule, no live scores, no brackets they can actually find.

What you deal with now

- A webmaster who is busy, gone, or the only one who knows the password.
- Assigning umpires by spreadsheet and a string of phone calls.
- Paper team entry forms, and chasing coaches for rosters and insurance.

The cost

- You are the help desk every June, instead of running the district.
- Good leagues and families assume the district is behind the times.
- Everything lives in your head, so nothing is in one place.

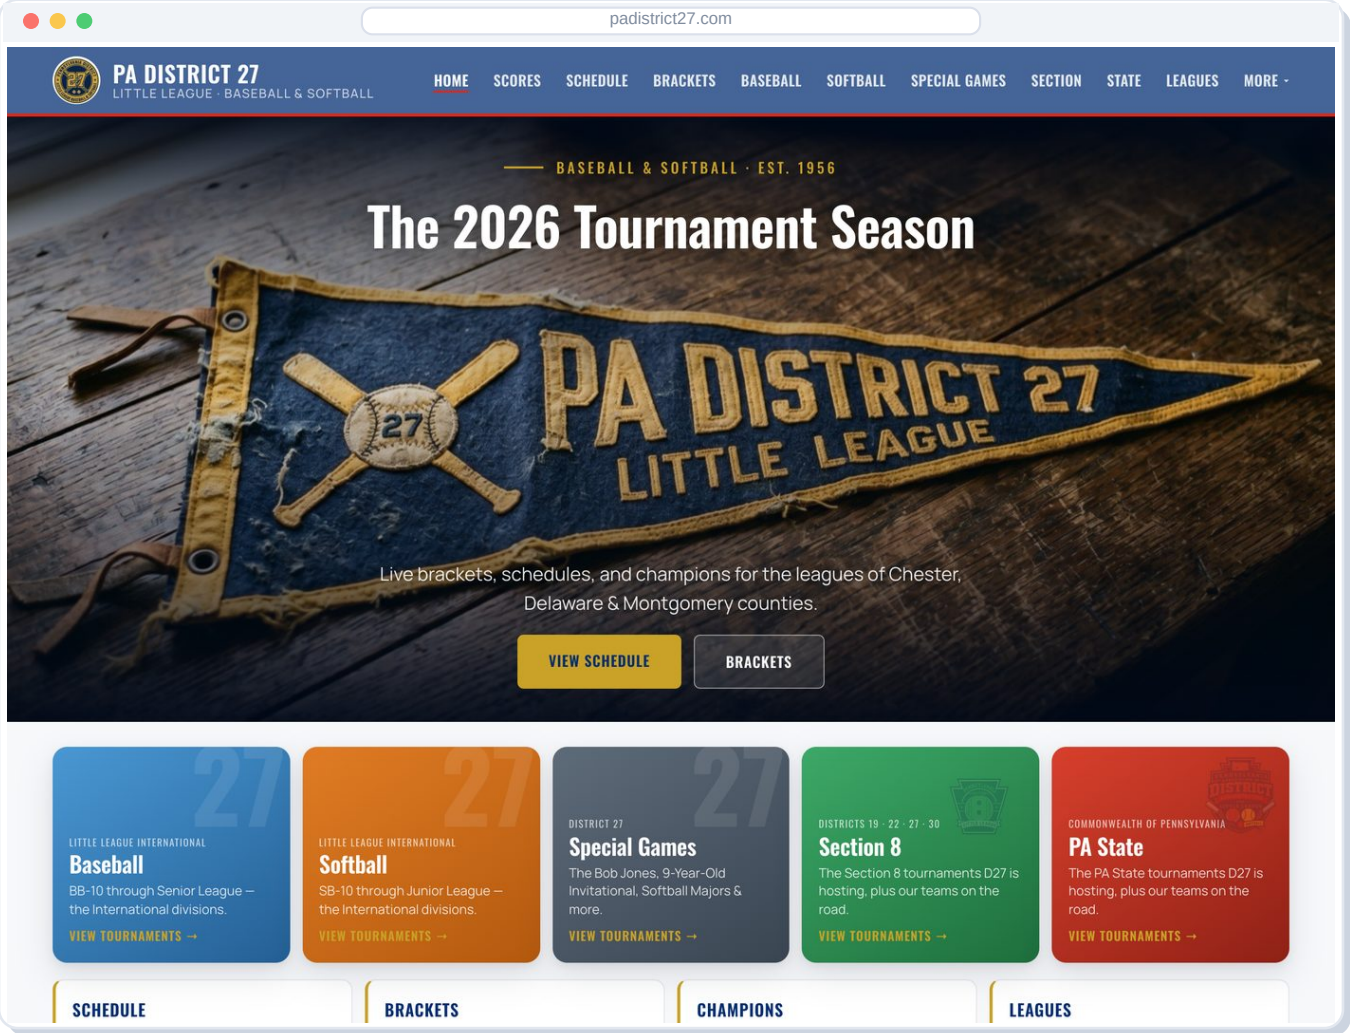

What this fixes

- One modern site that holds scores, schedules, brackets and champions.
- Umpire assigning, team forms and texting, all built in.
- You stop maintaining it — that part is on me.

02 ONE HOME FOR YOUR DISTRICT

Every league, one site.

Your member leagues, the tournament season, scores, standings and champions all live in one clean place that works on every phone.

The real PA District 27 home: the season, the divisions and quick links, all on one page.

Built for your whole district

- Baseball and softball, every division, in one site.
- Member leagues and their home fields, with directions.
- Fast and mobile, so families actually use it.

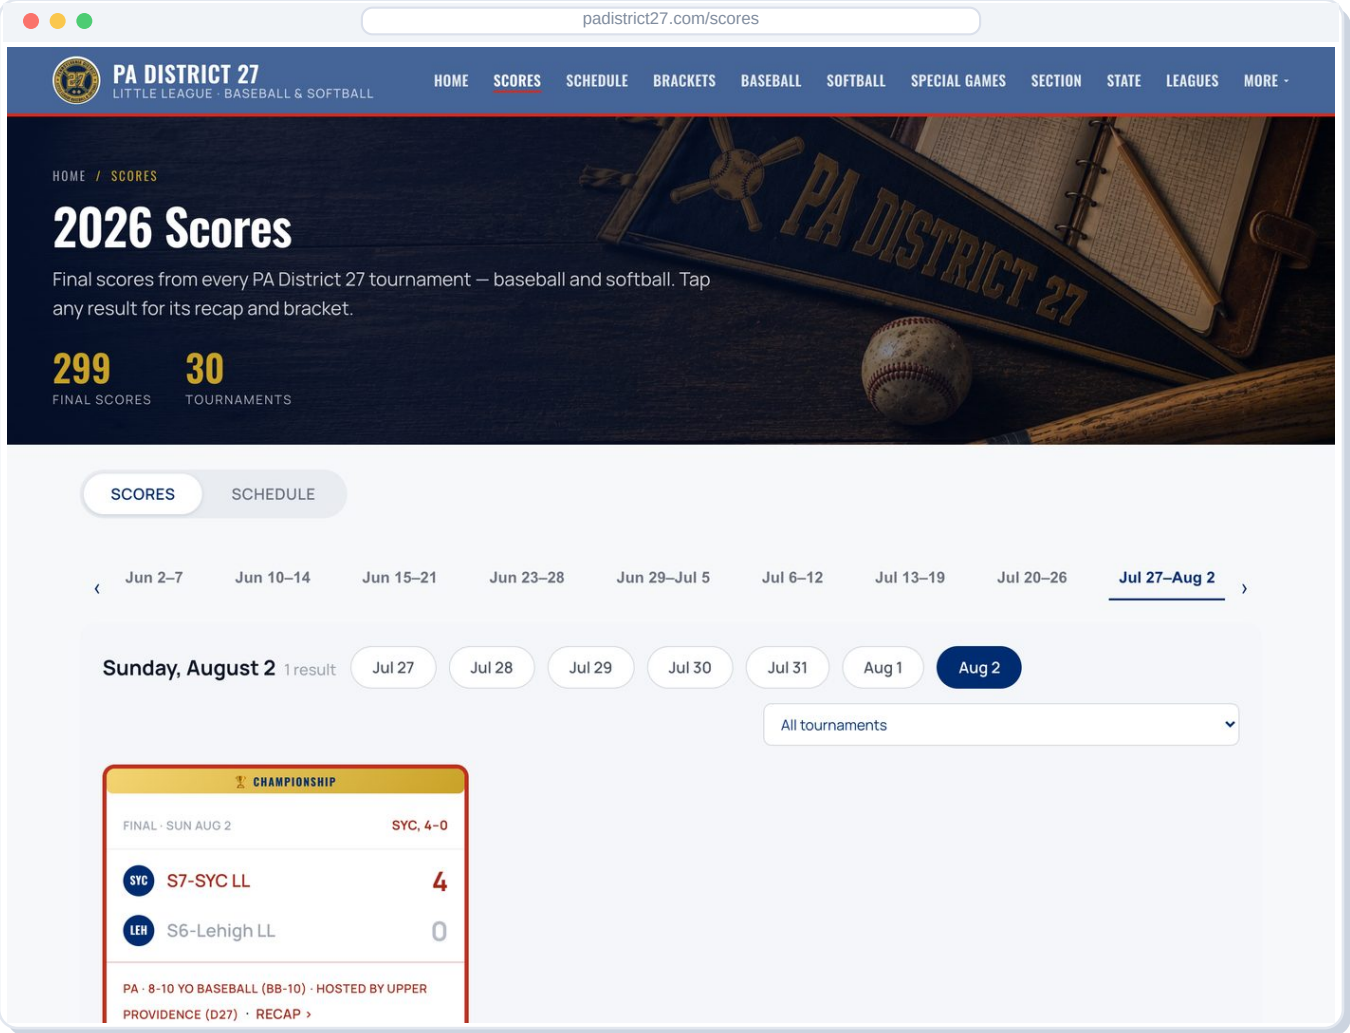

Nothing to maintain

- I set it up and keep it running all season.
- No webmaster, no passwords lost to a volunteer who moved on.
- Updates happen in minutes, not a help ticket.

03 LIVE SCORES AND SCHEDULE

Every game, as it happens.

Scores post from the field and standings update on their own. The whole schedule, by week and by day, is one tap away for every family.

A real scores page: 299 finals across 30 tournaments, each one a tap from its recap and bracket.

Scores that keep themselves current

- Post a final from a phone at the field.
- Standings, brackets and team pages update instantly.
- Tap any game for the box score and the bracket.

A schedule families can find

- Every game by week and by day, filterable by league.
- Game previews before first pitch, recaps after.
- Add any game to a phone calendar in one tap.

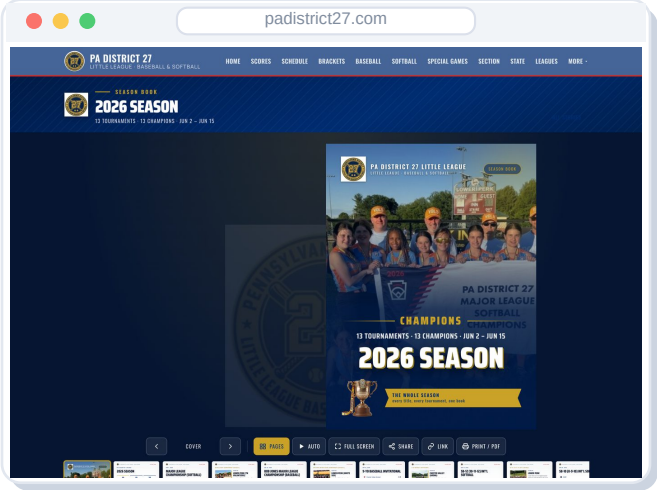

04 BRACKETS, CHAMPIONS AND A KEEPSAKE

Run it like the real thing.

Full double-elimination brackets that advance on their own, champions kept for good, and a season story book you can flip, share and print.

A real bracket and crowned champion.

A flip-through season story book.

Brackets done right

- Double elimination, seeding and if-necessary games.
- Enter a score and the winner advances automatically.
- One button prints a bracket for the snack-stand wall.

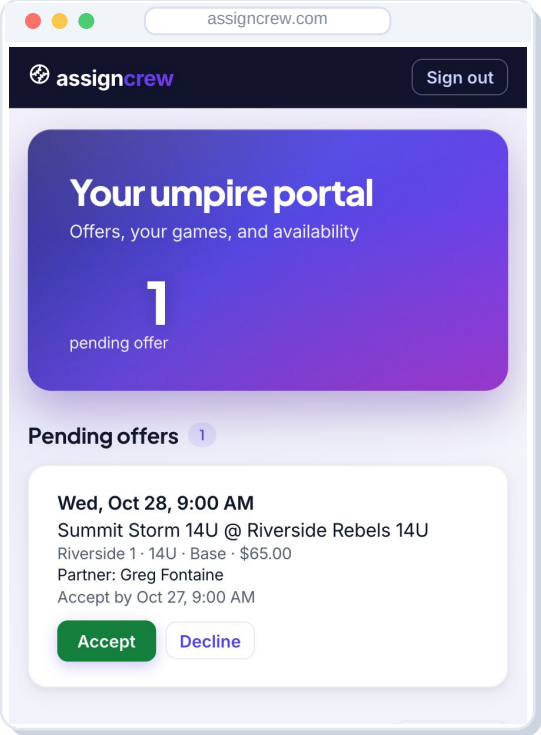

Champions kept forever

- Every champion archived with its photo.
- A season story book, written from the real scores.
- Families flip through it, share it, and print it.

05 UMPIRE ASSIGNING, HANDLED

No more spreadsheet, no more phone tag.

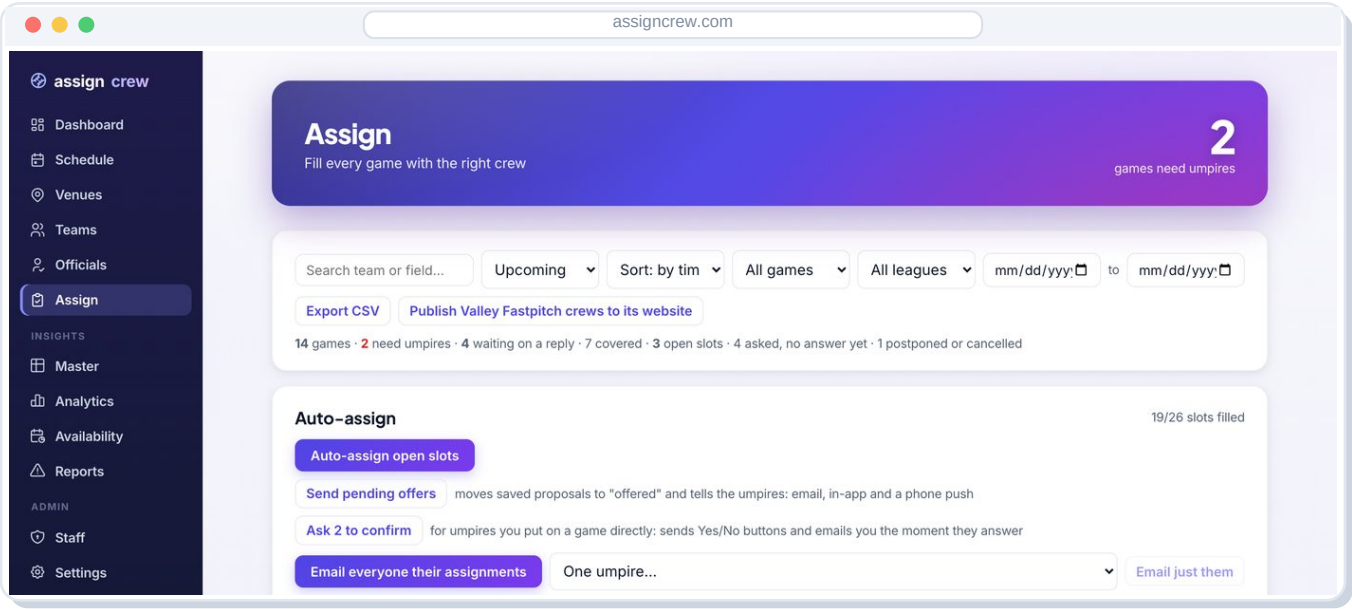

Your schedule flows straight into the assigning system. Umpires accept by text, pay tracks itself, and the crew shows back on your site. Built on AssignCrew.

How it looks for an umpire.

The whole loop, automatic

- Your tournament schedule reads in on its own — every game, field and time.
- Assign with one click, or auto-assign around availability, travel and conflicts.
- Each ump gets a text or email: tap Accept or Decline, no app, no login.
- Pay and mileage track themselves; export one report at season's end.

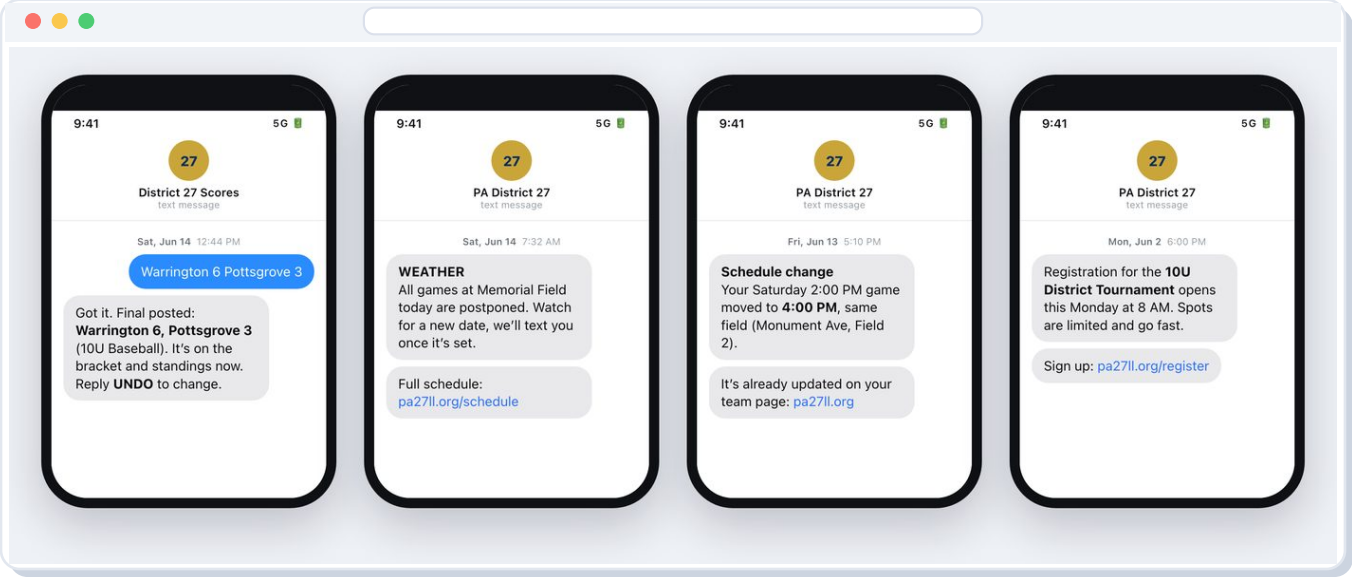

The assignor board: auto-assign, send offers by text, and publish the crew back to your site.

06 REACH EVERY FAMILY'S PHONE

A text beats a website nobody checks.

The one channel families actually read. Scores, rain-outs, schedule changes and reminders go straight to the phones of people who opted in.

Real alerts: a coach texts a score in, and families get rain-outs, schedule changes and announcements.

Right message, right moment

- Game-day score alerts the second a final posts.
- Rain-outs and cancellations to everyone affected, in one tap.
- Text-a-Score: a coach texts the final and it posts itself.

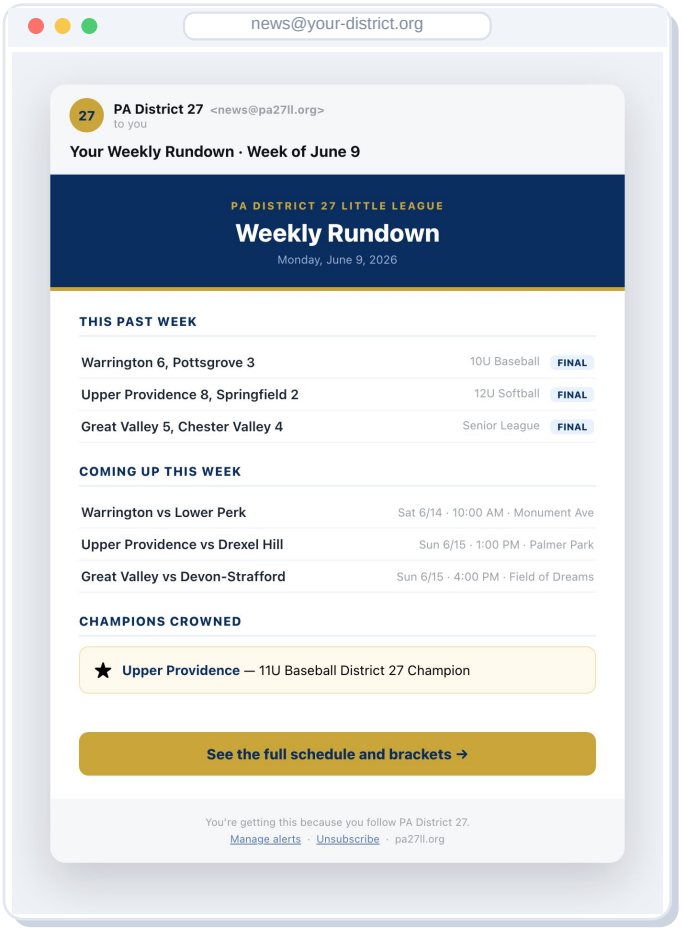

Done the right way

- Families opt in, with carrier-compliant sign-up handled for you.
- A push notification version for anyone who installs the site.
- One announcement reaches the whole district or one league.

07 EMAIL THAT ACTUALLY LANDS

Not a blast that goes to spam.

A branded weekly rundown and league-wide announcements, sent the right way so they reach the inbox, not the junk folder.

A real weekly email: last week's scores, this week's schedule and the champions, built for you.

Built to reach the inbox

- A branded weekly rundown goes out on its own.
- Announcements to the whole district or one league.
- Your domain, verified the right way, so it is not flagged as spam.

Proof it works

- 97% delivered across 15,000+ emails a month, near-zero spam complaints.
- That is what proper setup looks like, not a risky inbox blast.
- Families who opted in get it; everyone else is left alone.

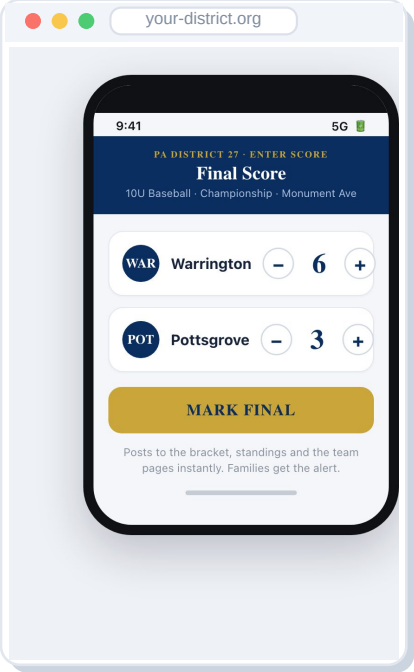

No tool to learn

- Write it in the admin, or reuse a template.
- Save it as a PDF or copy it to your own email.
- The schedule and scores fill themselves in.

08 BUILT FOR GAME DAY

The jobs you actually do, made easy.

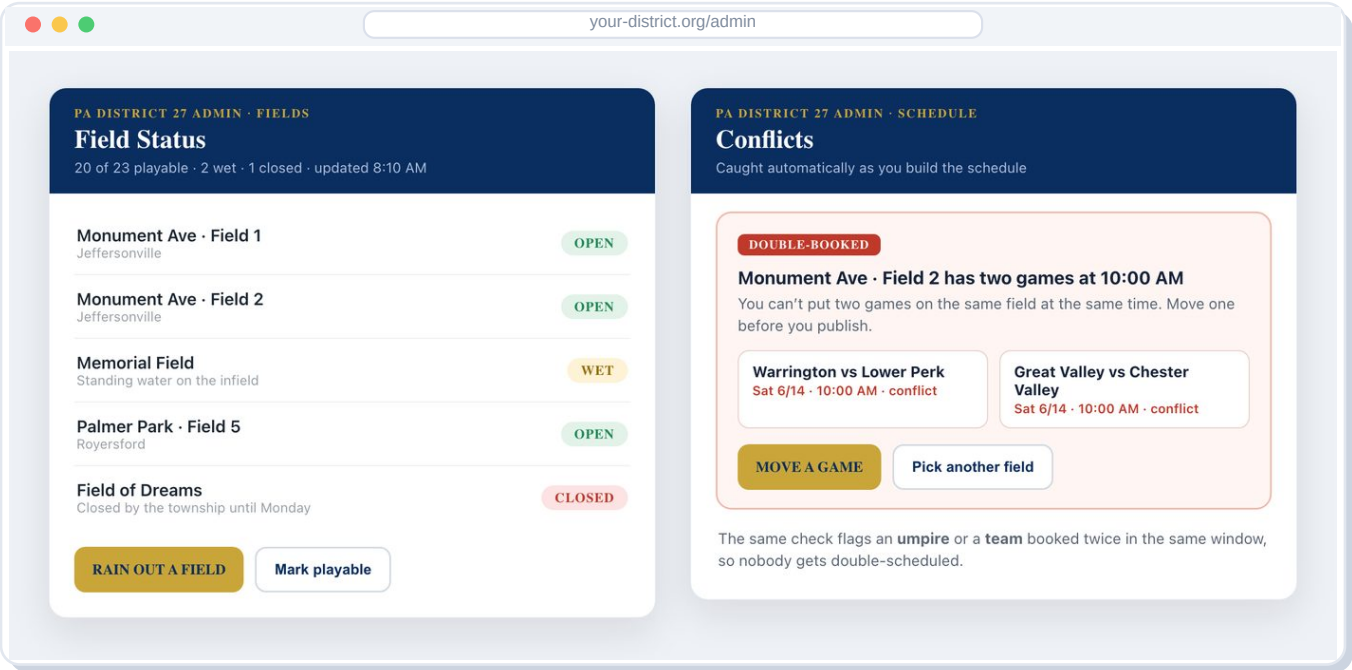

The day-to-day work of running tournaments, posting scores from the field, watching the weather and catching mistakes before they happen.

Post a final from your phone.

Score it from the field

- Tap plus and minus, hit Mark Final, done.
- It posts to the bracket, the standings and the team pages instantly.
- Families get the alert before you have left the parking lot.

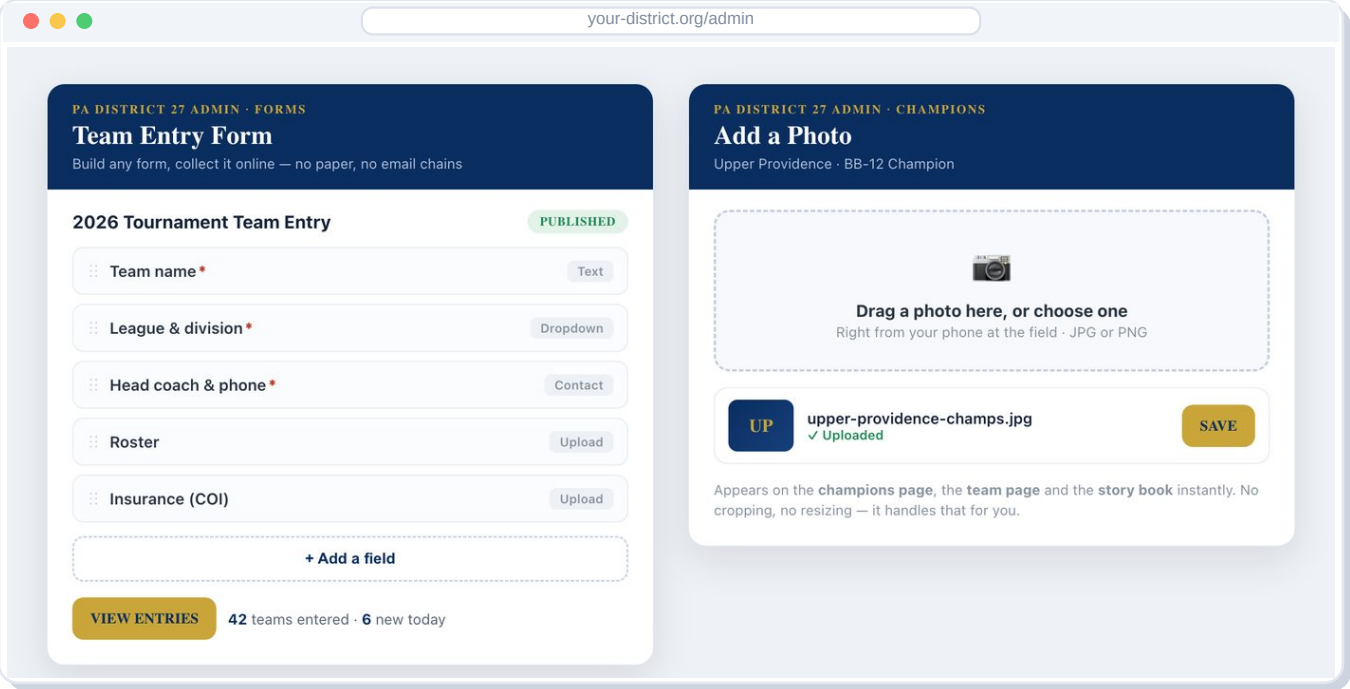

Live field status, and double-bookings caught automatically before you publish the schedule.

09 FORMS, PHOTOS AND THE LITTLE THINGS

The parts that save you hours.

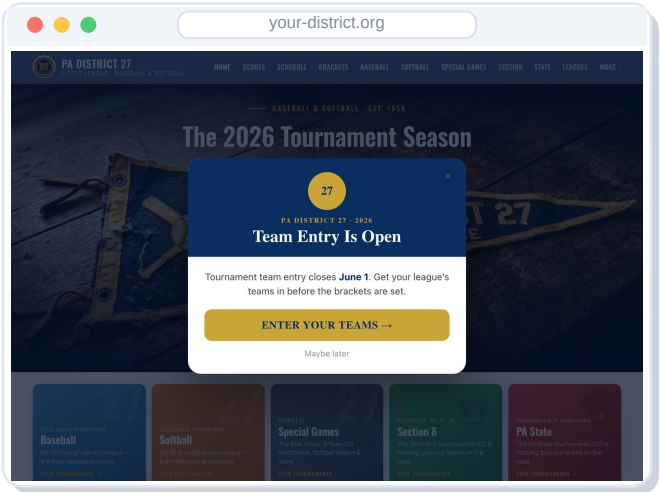

Online team entry that replaces the paper and the email chains, photos added in seconds, and a site that nudges families toward what matters.

Build any team-entry form and collect it online; add a champion photo in seconds, auto-sized for you.

Online, not on paper

- Team entry, rosters and insurance (COI), collected online.
- See who has entered and who still owes, at a glance.
- A pop-up on the site points families to registration, scores or an alert.

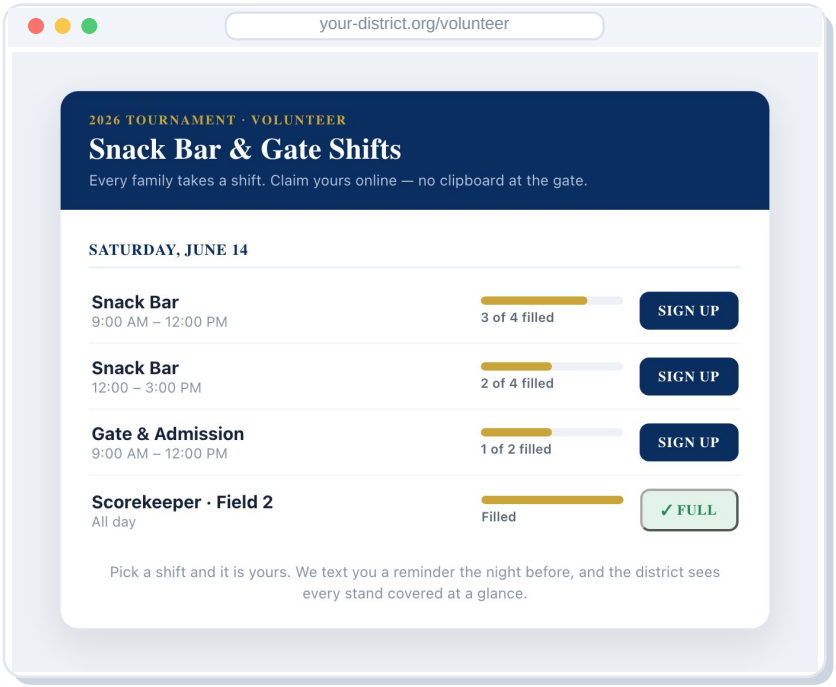

A site pop-up that drives sign-ups.

10 VOLUNTEERS AND THE SNACK BAR

Fill every shift without the clipboard.

The host league's snack bar, gate and scorekeeper shifts, signed up online. Families claim a shift, get a reminder, and the district sees every stand covered.

A real sign-up: families claim snack bar, gate and scorekeeper shifts, with a reminder text.

Online, not a clipboard

- Post the shifts once; families claim them.
- A reminder text goes out the night before.
- No begging for help at the gate on game day.

Every stand covered

- See which shifts are full and which still need people.
- Snack bar, gate, scorekeeper, field prep — any role you need.
- The host league and the district both watch it fill up live.

Counts that matter

- Great for leagues that require volunteer or service hours.
- One place for every tournament, every weekend.
- Export the list when you need who worked what.

11 THE PROOF, AND WHAT IS NEXT

This is not a concept. It is live.

PA District 27 runs on everything in this guide, today. I built it. The district runs it day to day and I handle the changes. I have built sample sites for other Pennsylvania districts as well, and I can build yours on your real leagues, schedules and champions.

See it for yourself

Open padistrict27.com on your phone right now. Every score, schedule, bracket, champion and the admin behind it is real. Picture your district's name on it instead.

padistrict27.com

What happens next

1. A quick conversation about your district, your leagues and your tournaments.
2. I build your site on your real data — you see it before anything goes live.
3. We point your web address at it, and your district finally has a modern home.
